## SKILLS

---

**Programming Languages:** Javascript, Typescript, HTML, CSS, Python

**Technologies and Frameworks:** React, Redux, Node.js, Express.js, Jest, Webpack, Git, PostCSS, GraphQL, PostgreSQL, MongoDB

## PROFESSIONAL EXPERIENCE

---

### Mya Systems

San Francisco, CA

#### Senior Front-End Engineer

Jan 2018 - present

- Lead the front-end applications architecture to develop reusable code using React, Redux, Typescript, ES6, Jest, and Webpack
- Establish the technology, frameworks, and methodology for the front-end team to improve development efficiency
- Collaborate with the product team to implement and launch highly-visible, customer-facing and internal-facing applications
- Develop a design system to improve visual quality and consistent user experience across multiple products

### Anki Inc.

San Francisco, CA

#### Senior Front-End Engineer

Jun 2015 - Jan 2018

- Provided technical direction and successfully launched an e-commerce website utilizing Salesforce solutions
- Developed personalized, user-facing features for customers from Europe, Asia, and North America
- Mentored engineers and designers in development technologies, tools, and processes
- Initiated style guide driven development to identify design and code consistency between internal and external teams

### BTS

San Francisco, CA

#### Front-End Engineer

Sep 2014 - Jun 2015

- Built a scalable component library to unify application designs and speed-up development using Javascript, Backbone.js, and Sass
- Improved code quality and development processes by writing documentation and established coding standards
- Created test strategies, introduced test-driven development, and wrote unit/functional tests to increase code coverage

### Cost Plus World Market

Oakland, CA

#### Front-End UI Developer

Oct 2011 - Sep 2014

- Developed responsive and dynamic web pages for the e-commerce platform and blog using JavaScript, jQuery, HTML, and CSS
- Improved front-end optimization, found and addressed performance issues, and achieved 4x faster page loads for mobile users
- Collaborated with content and analytics teams to improve revenue and decrease bounce rates by collecting data from website visitors using Google Analytics and creating 100+ Optimizely A/B tests

### Smart Web Idea

Chisinau, Moldova

#### UI/UX Designer

Sep 2008 - Sep 2011

- Managed and drove design processes for various projects from start to finish, created wireframes and prototypes, created visualized QA, and collaborated with the engineering team to resolve tracked issues

## PROJECTS

---

### Static Site Generator

Jan 2017 - Mar 2017

- Designed and developed an application to generate static sites using NodeJS, React, S3, and Contentful as a headless CMS

## EDUCATION

---

**Otus** - Team Lead and Software Engineering Manager

Aug 2019 - Jan 2020

**Udacity Nanodegree** - React, Front-End, and Full Stack Developer
